

Stop Waste, Save Money & Put Productivity Back In Your Facility

You've heard it before: Time is money... and every time your wrapping system fails, it costs you precious minutes, affects your bottom line and gives you a royal headache. Fortunately, there is a way to save money and time *without any startup costs* and a *guaranteed savings of up to 25%* with the Optimal Stretch Film System.

- No up-front costs
- Reduces the pounds of film used for shipping
- Maintains proper load containment
- 20% – 25% guaranteed savings
- Creates uniform results throughout your facilities
- Lowers your CO₂ footprint

What Is the Optimal Stretch Film System?

The Optimal Stretch Film System combines calibration, thorough training and high quality film for consistent results throughout multiple facilities ... with no up front costs and a guaranteed savings of up to 25%!

Savings of up to 25%? How?

Imagine perfectly calibrated machinery, top-notch film and an awesome training program, and you've realized the O. S. F. System. It saves you from wrapping nightmares, reduces waste, and increases cost savings that you can quantify.

The Results

The O. S. F. System provides quantifiable results that equal less damaged goods in the facility and in transport, reduced waste costs and a guaranteed savings of up to 25% – or we will pay the difference. Not bad for a top-notch wrapping solution!

Stop Wasting Money Now!

You can start saving up to 25% with **no up front costs...** but only if you act now.
